Powder coating is a high-quality finish found on thousands of products you come in contact with each day. Powder coating protects the roughest, toughest machinery as well as the household items we depend on daily. It provides a more durable finish than liquid paints can offer, while still providing an attractive finish. Powder-coated products are more resistant to diminished coating quality as a result of the impact, moisture, chemicals, ultraviolet light, and other extreme weather conditions. In turn, this reduces the risk of scratches, chipping, abrasions, corrosion, fading, and other wear issues. It's tough! It looks great! And it lasts a long-long time. In addition to being durable, powder coating is an attractive choice due to its environmental advantages.

#### Types of Powder Coating:

- Epoxy Polyester (Indoor Durable)
- Pure Polyester (Outdoor Durable)
- Pure Epoxy (Chemical & Corrosion Resistance)

#### Our Parallel Verticals:

##### Metal Pretreatment Chemicals

We have been manufacturing pretreatment chemicals for more than 25 years. We make Degreasing Chemicals, Derusting Chemicals, Phosphating Chemicals, and Passivation Chemicals for Mild Steel. Degreasers and Chromatisers for Extruded and Alloy Aluminium. Pretreatment Process is essential in corrosion protection. We are capable of manufacturing all types of pretreatment chemicals for powder coating. Pretreatment can be used before powder coating and liquid paints as well. We have an experienced and problem-solving skills R & D team. We can develop and modify the pretreatment system as per the customer's needs. We are a phosphating chemical manufacturer and exporter to many countries.

##### SPRAY PAINT

We are experts in giving perfect paint matching spray paint in aerosol form. High quality of colors and other raw materials used in producing spray paint. Our spray paints are used in many industries like Electrical Panel, Automobile components, Lighting, and many more. We are also capable of manufacturing HR (Heat Resistance) paint. Our heat resistance spray paints are capable of bearing 300 degrees Celsius temperature. During installation or transportation, components get scratched and peel off. Spray paints play a beneficial role in covering this kind of scratch and peeling off the problem. Touch-up colors are a top-rated product in the powder coating finishing industry.

# AMAN CHEMICALS INDIA

Mfg.: Metal Pretreatment Chemicals, Spray paint & Powder Coating (Since 1997)

An ISO 9001:2008 Certified Company

Unit-I: 2, Om Market, Om Nagar, Badarpur, New Delhi-110044, INDIA.

Unit-II: I-38-39, UPSIDC, MG Road Industrial Area, Phase-3, Ghaziabad, U.P-201015. INDIA
